

# I am a derivatives trader

We offer you rich data with a focus on the latest trends in global structured products, capital flows and the total risk in the market so you can take more informed and faster decisions with respect to your books.

## Why it matters

Derivatives trading involves making high-stakes decisions about which investments will provide the greatest reward. There is a lot of data to help guide these decisions, but it's often scattered and difficult to interpret. Further, existing data solutions fail to provide the level of detail needed to truly make the most informed decisions. Our solutions fill this gap by providing a greater level of granularity and presenting data in a more meaningful format.

## How we can help

- We understand that, in managing your books, you are required to make far-reaching and impactful decisions. Our SPi database has you covered by providing:
  - Outstanding volumes
  - Current levels
  - Reference assets
  - Scheduled maturities
  - Call events
- You can access our database via API or through a web user interface to make sure you have all relevant information at your fingertips.
